Sub : - Let us cooperate in Measles Rubella Vaccination Campaign to eliminate Measles and to control Rubella in our children.

Sir/Madam,

I write this with a great sense of urgency and responsibility about MRVC programme which will start from 1st October 2018 to eliminate life threatening & killer diseases called Measles and to control Rubella for children from 9 months to 15 years old child. This is introduced by the government of India free of cost. I seek your cooperation to encourage and motivate the children who go to different schools from your village and also even the children (9 months – 15 yrs) who are not going to schools to receive MR vaccination. I also request you to motivate the parents/guardian of these targeted children in order so that they avail these free services without any doubt to eliminate this life threatening disease. It is your responsibility as the headman and leader of the village to ensure that every children stays fit and healthy with prevention of Measles Rubella diseases.

I am also to clarify and to request you to kindly have a meeting with the parents, religious leaders, teachers and elders in your village to protect and prevent any internet viral news that was wrongly spread without any case verification which creates doubt and confusion amongst the public regarding Measles rubella vaccine.

Let us work together in unity for the welfare of our children and community.

Thanking you.

Deputy Commissioner
Cum Chairman,
District Health Society,
South West Garo Hills, Ampati.
